ABOUT US

SHANGHAI HAOLIAN AUTO PARTS CO.,LTD. established in 2014, Shanghai haolian is a professional manufacturer and exporter that is concerned with the design, development and production of auto parts. We are located in Shanghai, with convenient transportation access. All of our products comply with international quality standards and are greatly appreciated in a variety of different markets throughout the world.

Covering an area of 4000 square meters, we now have over 50+ employees, an annual sales figure that exceeds USD 100 million and are currently exporting 70% of our production worldwide. Our well-equipped facilities and excellent quality control throughout all stages of production enables us to guarantee total customer satisfaction.

As a result of our high quality products and outstanding customer service, we have gained a global sales network reaching America, Europe & Russia.

If you are interested in any of our products or would like to discuss a custom order, please feel free to contact us. We are looking forward to forming successful business relationships with new clients around the world in the near future.

We are manufacturer in China and specialized in high performance suspension parts and filtration over 10 years, we help find solution of all suspension parts which should be repaired.

Suspension parts which we focus on are Stabilizer link, bearings, ball joints, tie rods, control arm boots for CV joints and Shock absorbers, all parts painted by import coating. We control the parts from every step.

Filtration we specialized in Automobile filters & Truck filters and Machinery filters, we accept customized the filters which you have demand as well. All material can be customized by yourself and we have low MOQ for test the quality first with wholesale price.

<< Corporate History

2006

Founding & Early Years (2006-2008)

Automobile Filtration and Machinery Filtration

2009

Industrialization & Expansion (2009-2010)

Globalization of supply chains first Step among Asia

2011

Globalization & Consolidation (2011-2010)

We start involved in Vateria Spare Parts area and globalization

2014

Digital Transformation (2014–Present)

Traditional sales face declining demand start Online sales

2024

Future Trends (2024-Future)

Implementing AI-powered Customer one-stop service

Filtration system >>

Features:

1. Removes contaminants (particles, sludge) from engine protect internal components
2. Cleans incoming air to prevent dust/dirt from entering the engine
3. Traps rust, dirt, and water from fuel to protect injectors/pumps
4. Purifies air entering the HVAC system (pollen, PM2.5, odors)

Coolant System >>

POWER STEERING HOSE

FUEL HOSE

TURBOCHARGER HOSE

VACUUM HOSE

Silicone hose

COOLANT HOSE

Features:

1. Transfers coolant between the engine, radiator, and heater core to regulate engine temperature.
2. Delivers fuel from the tank to the engine (injection/carburetor systems)
3. Connects intake manifold to components like brake boosters, PCV valves, and emissions controls.
4. Transfers hydraulic fluid between the pump, rack, and reservoir.
5. Routes compressed air from turbo to intercooler/throttle body.

Car suspension parts >>

Features:

1. Limits vehicle lean when cornering for better handling
2. Maintains even tire grip by minimizing weight transfer
3. Transfers forces between the anti-roll bar and control arms/struts
4. Reduces excessive sway without compromising ride quality

Stabilizer Bar

ball joints

Stabilizer link

Rock end

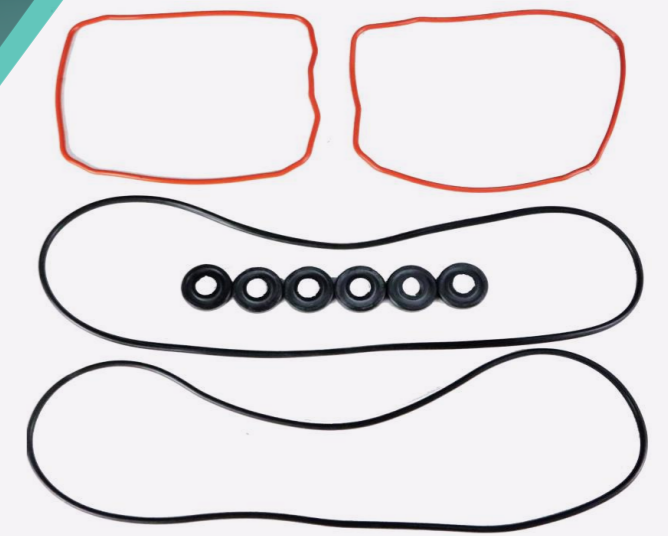

Brake pad

Valve Cover gaskets kit >>

Features:

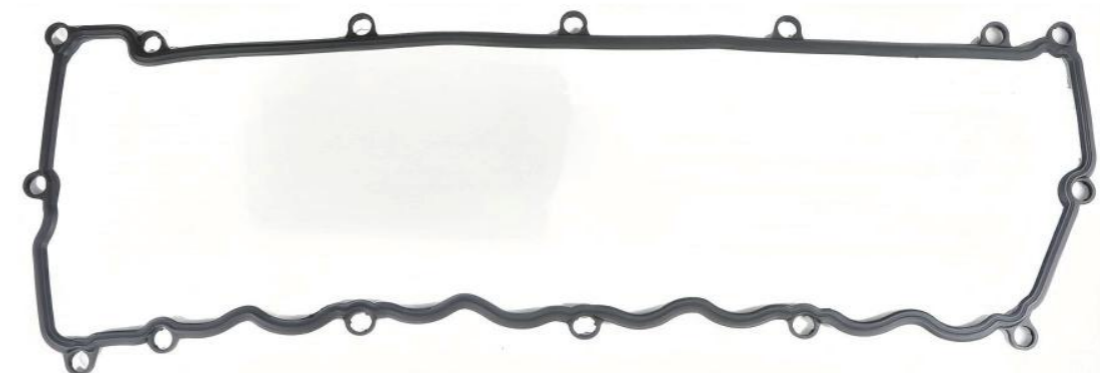

1. Seals gaps to stop oil from dripping onto exhaust/engine
2. Quality gaskets withstand engine heat (~300°F+) and oil exposure
3. Stops oil loss, preventing damage to spark plugs & ignition coils
4. Precision-cut for specific engines

Valve Cover gaskets kit

Valve Cover Repair kit

Valve Cover gaskets

Ignition system >>

Features:

- 1.Voltage Spark (20,000–50,000V) to ignite the air-fuel mix
- 2.Optimizes efficiency and power
- 3.Adapts to Engine Conditions (RPM, load, temperature).
- 4.Works in all weather conditions

ignition coil

ignition coil 2

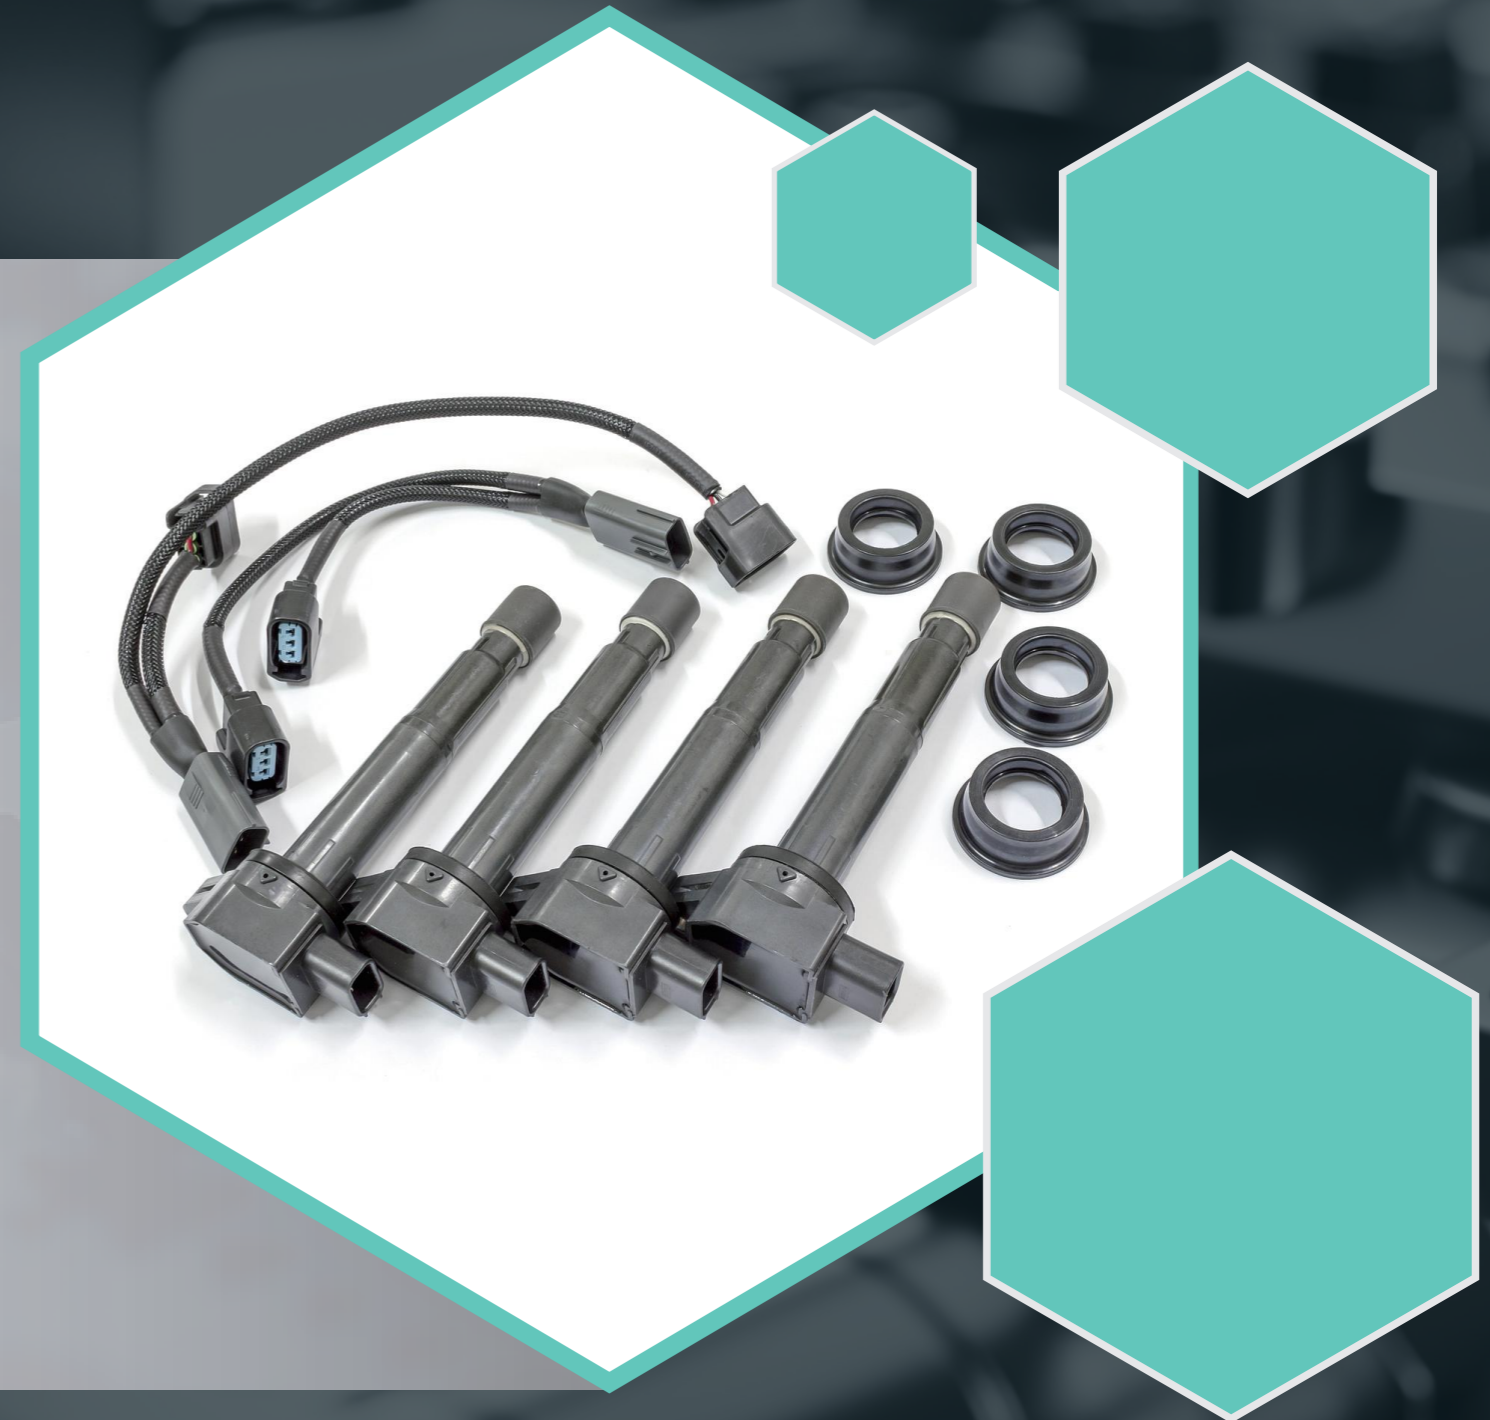

Ignition wire

Spark plug

Spark Plug detail

ABS sensor

Temperature sensor

Crankshaft sensor

oxygen sensor 2

Sensor System >>

Features:

1. Real-Time Air-Fuel Ratio (AFR) Monitoring
2. Closed-Loop Fuel Control
3. Supports Emission Control
4. Wide Operating Range
5. High Accuracy & Fast Response

Water temperature control system >>

Features:

1. Temperature Regulation
2. Improved Fuel Efficiency
3. Emission Control
4. Fast Response & Durability
5. Fail-Safe Mechanism (Some Models)

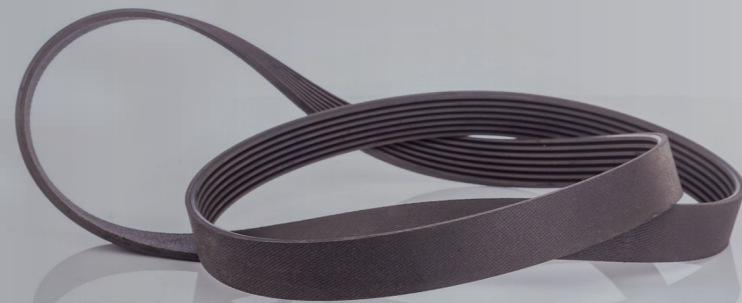

Wax-type thermostat

Water pump

electric water pump

Timing Belt

Timing Belt

Brake shoe

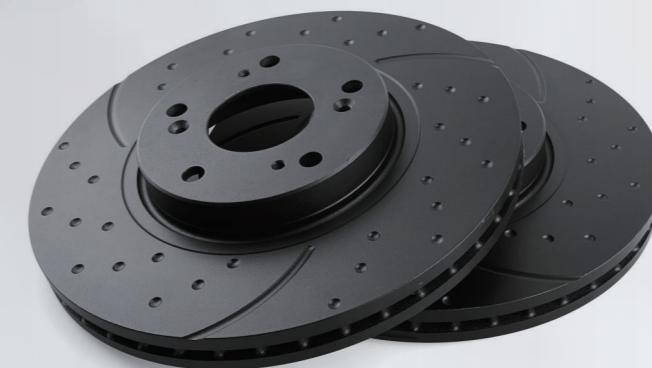

Tension Pulley

Belt Tension

Brake pad

Brake rotor

Brake and Accessory Drive System >>

Features:

- 1.Slows down or stops the vehicle safely
- 2.Critical for safety (prevents accidents)
- 3.Driver input (brake pedal)
- 4.Powers engine-driven accessories via belt/pulley system
- 5.Essential for comfort & vehicle operation
- 6.Runs continuously when the engine is on
